# pawzone

**Pawpaper**

It all started with a proposal that resonated with the greatest community the web3 space has ever witnessed.

This is dedicated to Ryoshi.

# ACKNOWLEDGEMENTS

*The Pawpaper is a product of PawZone and commissioned by the co-founders for the purpose of public dissemination.*

The Pawpaper will soon be available in other languages.

# DISCLAIMERS

Note that this is a whitepaper highlighting the features, benefits, and future plans PawZone has to offer.

No VC has been involved. Everything has been funded entirely by the team. We could have VC's by sending them a large allocation like most other projects, but we believe in the true incentive behind the blockchain which is the ability to put the power in the right hands, not the wealthy.

Our applications are EVM compatible in line with Shibarium.

# PAWFIGHTERS

A community that stands up for one another and helps them achieve the same fortunes are deemed for success. There exists no stronger community in the crypto space. We are all Ryoshi.

With fierce determination and unwavering loyalty, the Pawfighters stand as a mighty force, guarding the ShibArmy against the looming threats of Shadowcats, inspiring them to follow the words of Ryoshi to fulfill his vision for a Shiba state.

*In the darkest hour of the night,*

*When shadows surround and hope takes flight,*

*A flicker of light can break the fright,*

*And show the way to a new height.*

**Shibarium paves the way for endless possibilities in expanding the Shiba Inu ecosystem and we have been one of the first to venture in this frontier.**

# PAW

Unleashing the Pawer for a Decentralized Future

# PAW TOKEN

Introduced back in 2021, the PAW token puts all the pieces together.

We would like to think of $PAW as an unofficially official token in the Shiba Inu ecosystem. The major incentive of $PAW is to be the currency that fights for the Shiba Inu ecosystem. Although the main priority for PawZone will always remain to add utility and burns for the Shiba Inu tokens, $PAW needs to have a place in the pack filled with utilities of its own. $PAW was developed through years of researching other coins similar to it and diagnosing the flaws they had. From there, we envisioned ways to alleviate those flaws. The same applies for the applications in general.

In fact, $PAW has an immense amount of utility, since it is used in an amalgamation of applications it will have use cases for. We are combining the use cases our token has with an NFT marketplace, play-to-earn Gaming Guild, and DeFi platform. Most tokens have utilities for only one of these.

## TOKEN ALLOCATION

Initial Liquidity - 50%
Founders – 10%
PawZone Treasury Fund - 20%
Bridge Allocation - 20%

Total Supply - 1,000,000,000,000 t
0% buy and sell tax

## INITIAL 50% TOKEN BURN

**PAW BURN ADDRESS -** 0x000000000000000000000000000000000000dead

https://etherscan.io/tx/0xfefb86e931d1ac706f55e956d6abfd66778b9ab50f847f0a7f3276ea8b5c8a58

# PAW UTILITIES

**Governance** - The $PAW token grants holders essential rights and governs our protocols using a weighted system. The voting power of each holder is determined by the amount of $PAW they hold, making it a fair process.

**Purchasing Power** - $PAW holds significant purchasing power within Pawzaar and Shiba Inu GG alone. It can be used as a medium of exchange for acquiring digital assets and leveling up in Shiba Inu GG. We want to also encourage purchasing power from other avenues like digital shops and exclusive events.

**Collateral Currency** - The $PAW token can be used as a currency for borrowing and lending on PawFi, providing additional utility and flexibility to token holders.

**Guild Progression** - $PAW is required for leveling up within Shiba Inu GG, granting members access to higher ranks, exclusive benefits, and inreased earning opportunities. All $PAW used to level up is sent entirely to the burn address, thus helping stablize the price. All profits made from play-to-earn games in Shiba Inu GG is converted to $PAW which will positively impact the price of $PAW and 20% of what Shiba Inu GG earns is then burned.

**DeFi Capabilities** - PawFi harnesses the DeFi capabilities of the $PAW token, enabling users to participate in decentralized finance activities such as staking and liquidity provision.

**Raffles** - $PAW token holders have the opportunity to participate in raffles, providing exciting chances to win whitelist spots and engage in significant community activities. All $PAW is then sent to the burn address, creating even more deflationary pressure.

By incorporating these diverse utilities, the $PAW token offers a comprehensive ecosystem that empowers holders, stimulates engagement, and amplifies the value of participation within our vibrant community.

# HOW TO BUY PAW

**Token Address:** 0x1AA51bc7eb181ce48CE626Bf62f8956Fa9555136

# STEAK

The Most Valuable Token to All Shiba Inus

**All dogs bury treasures they deem precious, and for Shibas, nothing holds more demand than a succulent piece of $STEAK.**

*$STEAK stands as the embodiment of all that $SHIB tokens encompass: the versatile utilities of $SHIB, the governance mechanisms of $BONE, and the exclusivity reminiscent of $LEASH.*

# TOKENOMICS

## TOKEN SUPPLY
100,000

## ALLOCATION
12% FOUNDERS AND TEAM
52% COMMUNITY
28% STAKING
8% AIRDROP CAMPAIGN

Only 100,000 portions of STEAK will ever be in circulation, igniting a race to accumulation like no other. With such a scarce supply, the allure of securing all the benefits drives the desire to acquire as much as possible before the masses catch on.

At launch, the majority of the supply, comprising 52% of the total, has been made available to the community, paired with ETH on the Ethereum network and BONE on the Shibarium network. This leaves a mere 28% accessible exclusively through staking on PawFi and 8% through anphased out airdrop campaign.

The remaining allocation is reserved for founders and team which is secured in a vesting smart contract via a multi-sig wallet for enhanced security.

# TAXES

Here is the breakdown of the tax structure for $STEAK.

**Day 1: 3% Buy 10% Sell**

**Day 2: 2% Buy 7% Sell**

**Days 3–7: 2% Buy 5% Sell**

**Week 2: 3% Buy 4% Sell**

**Week 3: 3% Buy 3% Sell**

**Week 4: 2% Buy 3% Sell**

**Week 5 and onwards: 2% Buy 2% Sell**

Taxes will be sent to a treasury to provide funding for projects, team members, liquidity on DEXs, CEX listings, marketing, and token buybacks.

# UTILITIES

STEAK is an exclusivity token with governance, platform use cases, VIP access, and token buybacks.

PawFi Governance - Users will be able to make vital decisions impacting the future of PawFi and $STEAK in the DAO. Each STEAK counts as one vote cast.

DeFi Utilties - Added utilities on PawFi such as lending your STEAK as collateral or staking your STEAK for APY.

Exclusive Access - Holding certain amounts of STEAK will be grant differnt multipliers in the upcoming PawFi airdrop campaign.

20 STEAK will be eligible to use the PawFi token creation feature on Ethereum and Shibarium for free.

30 STEAK will receive automatic qualification in all weekly raffles which will contain prizes such as Shiboshis and Shiba Inu tokens.

100 STEAK can attend IRL events and meets organized by PawZone

500 STEAK are eligible to have their token of choice listed on our platform to earn STEAK for their holders. (Tokens will be audited and must be a Shiba Inu related project)

1000 STEAK are granted revenue share on PawFi.

Token Buybacks - A portion of PawFi fees will be used to buyback and burn $STEAK.
A portion of token taxes will be used to buyback and vault $STEAK.

# HOW TO BUY STEAK

**Ethereum Token Address:** 0x1AA51bc7eb181ce48CE626Bf62f8956Fa9555136

# PAWZAAR

Pawzaar is the first NFT marketplace built for the Shiba Inu ecosystem and designed to be fully operable with the Shibarium network. It offers users the ability to buy, sell, trade, and lend out NFTs, providing a smooth experience with low gas fees and quick transaction speeds. Pawzaar introduces a deflationary mechanism for $SHIB, where a portion of every transaction fee is reserved and sent to the $SHIB burn address. **We aim to become the primary NFT marketplace for the Shibarium Network.**

Pawzaar is not a fork and contains an addicting UI/UX built from the ground up. PawZone offers the best royalty rates for NFT developers (up to 10%) and the lowest fees for the users (1.8%).

Our marketplace will accept several currencies and even NFTs as a means of purchase. Furthermore, a percentage of EVERY transaction will be sent to the $SHIB burn address. Pay with any available currency to purchase or lend NFTs that will then be swapped for the token requested by the seller.

## Main Functionalities

Buy and Sell NFTs: Users can buy and sell NFTs using different currencies. They can make transactions with $PAW, $ETH, $USDC, $SHIB, or $SHI (once the stable coin is released) and purchase NFTs that will be swapped for $SHIB. Sellers can only list their NFTs for $SHIB.
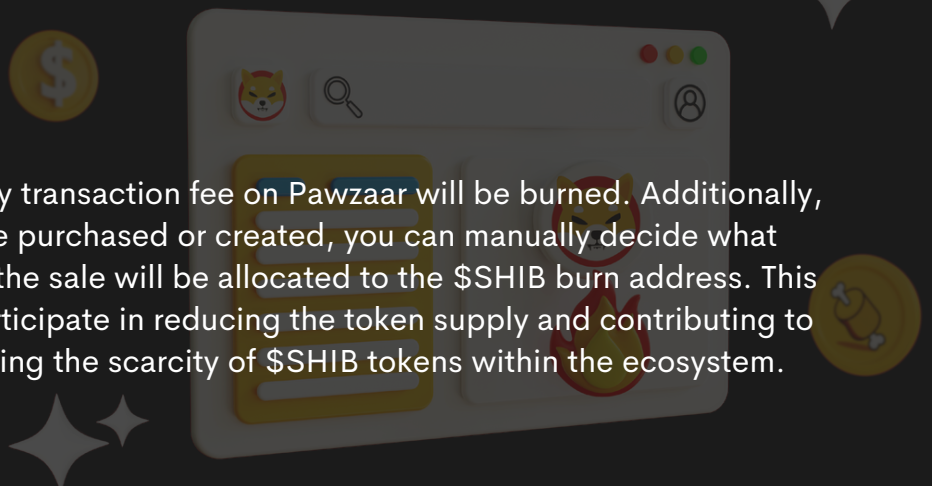

Deflationary Mechanic: Pawzaar incorporates a deflationary mechanic by sending a portion of every transaction to the $SHIB burn address. This ensures a continuous reduction in the supply of $SHIB tokens.

## TRANSACTION FEES

Pawzaar contains some of the lowest transaction fees at 1.8% (0.5% goes to the $SHIB burn address, 0.3% goes to the treasury, and the remaining 1% gets redistributed amongst the community). Unlike most other marketplaces, the team does not pocket a single penny in fees. More specifically, Pawzaar redistributes all the potential profits made from transaction fees.

## SHIB BURNS

As previously stated, 0.5% of every transaction fee on Pawzaar will be burned. Additionally, when you list an NFT that you have purchased or created, you can manually decide what percentage of the proceeds from the sale will be allocated to the $SHIB burn address. This enables NFT sellers to actively participate in reducing the token supply and contributing to the ongoing burns, further increasing the scarcity of $SHIB tokens within the ecosystem.

# CREATE YOUR OWN NFTs

Users will be able to create their own NFTs and sell them on their store page. We will also contain a launchpad for projects to help members create a collection that will then be minted directly on the Pawzaar platform. We will start things off with our very own NFT collection filled with perks in the marketplace and 100% of the net profit from the mint will be sent to the $SHIB burn address. We have established several partnerships for future collections that will be announced later on.

There will be the ability for users to effortlessly bulk mint their entire NFT collection directly from our platform. Recognizing the need for a streamlined and efficient process, we have developed a groundbreaking solution that simplifies the minting process, saving users valuable time and effort. By leveraging our intuitive interface and advanced minting tools, individuals can upload and mint multiple NFTs in a single batch, eliminating the tedious task of minting them one by one. This not only enhances the user experience but also enables creators, artists, and collectors to rapidly showcase their entire collection on our platform, maximizing efficiency and fulfilling simplicity.

Users will be able to create and showcase their own customizable marketplace NFT storefronts, seamlessly integrated within their profile pages. Pawzaar allows individuals to take full control of their creative endeavors. By leveraging our cutting-edge tools and technologies, users can curate and exhibit their unique NFT collections, establishing a direct connection with a global community of art enthusiasts, collectors, and investors.

We made the interface very straightforward to make the creation process as fluid as possible.

# PLATFORM OVERVIEW

## LIBRARY

The user's library on our NFT marketplace offers a personalized and organized space for users to showcase their NFT collection. Each account has the option to set up a profile image and include their social media links. The profile library allows users to display all the NFTs they own or have created. Users can effortlessly monitor their activity, including listings and NFTs they've favorited, ensuring they have a clear overview of their interactions within the marketplace. This page lets users navigate and manage their NFT portfolio with ease.

## COLLECTION STORE PAGE

The store page of a particular collection is where users can browse NFTs on the market. Each store page includes a detailed description of the collection, allowing users to gain a deeper understanding of its theme and concept. Users can access information such as the social media links associated with the collection, the creation date, the creator's username, the total number of items available, the floor price indicating the lowest listed price, the total volume of transactions, and the number of unique owners who possess items from the collection. Furthermore, we provide an analytics page dedicated to each collection detailing useful information that educates the user.

## EXPLORE AND STATS

The explore page lets users navigate through various categories such as art, gaming, or music to discover NFTs that align with their preferences and see what's trending. Additionally, users can explore the top collections with the stats page, gaining insights into the most popular and highly sought-after NFTs in the market. Moreover, users can explore other users' profiles, gaining inspiration and discovering new collections based on what other enthusiasts hold.

## COMPLEX ANALYTICS

Our marketplace is equipped with a robust set of tools and analytics designed to empower NFT collectors with valuable insights. From individual project details to the broader NFT market trends, our platform enables users to access critical information effortlessly. Through intuitive charts and data, users can closely monitor key metrics such as sales volume and average sale price for specific NFT collections. Furthermore, we provide comprehensive analytics encompassing the entirety of Pawzaar, allowing users to gain a holistic understanding of the platform's performance. With an emphasis on user experience, our platform presents this wealth of information in a clear and organized manner, ensuring users can navigate and utilize the data effectively.

## LISTING NFTs

For purchased NFTs, you can set the desired price, specify the duration of the listing, and even determine the percentage of the sale that will be burned, contributing to the sustainability and growth of the ecosystem.

If you're listing an NFT that you created, you can choose the supply of your NFT, give it a unique name, and provide a description that highlights its features, and input social media links. You are then given the option to select the appropriate collection you would like the NFT to be a part of. Furthermore, our platform supports the inclusion of properties, levels, and stats, allowing you to add layers of depth to your NFT.

→

## NFT LAYOUTS

Users can choose from three distinct layouts for displaying their NFTs: default, large, and list. The default layout presents NFTs in a balanced and visually appealing format, providing an intuitive browsing experience. For those seeking a more immersive view, the large layout showcases NFTs in a prominent and visually striking manner, allowing users to appreciate the intricate details. On the other hand, the list layout offers a concise and streamlined presentation, ideal for users who prefer a comprehensive overview of a collection. With these diverse layout options, users can personalize their viewing experience and explore NFTs in the most engaging and convenient way that suits their preferences.

## PROPERTIES

The majority of NFTs possess a distinct set of traits that define its individuality, whether it's the eyes, land, sound, or other defining characteristics. These traits allow collectors to curate a diverse collection tailored to their preferences. From rare traits that enhance value and desirability to dynamic traits that bring motion and interactivity, NFT traits elevate the experience of owning and trading these digital assets. By utilizing trait-based filtering, you can easily narrow down your search and display only the NFTs that possess the specific traits you desire.

## FILTERS AND ORDERING

Pawzaar allows you to filter and determine an ordering preference which enhances the browsing experience for users. With the ability to filter collections and access a variety of ordering options, users can easily customize their search to find exactly what they're looking for. Located on the left side of numerous pages, the filter options provide a convenient way to refine search results based on specific criteria. And when users want to reset their filters and broaden their search, they can simply click on the "Clear filters" button.

## VERIFIED COLLECTIONS

We have implemented a verification system that distinguishes collections by a checkmark, signifying their legitimacy. After creators apply for verification, we will see if the project meets the conditions. To be eligible for verification, a project must demonstrate a minimum total trading volume of at least 100,000,000 SHIB. We will check to see that the NFTs have accurate metadata. This rigorous criterion ensures that only established and reputable projects receive the coveted verification status, providing users with added confidence and assurance when engaging with these collections.

## SPOTLIGHT

Pawzaar offers a distinctive spotlight feature that showcases NFTs on our front page. This provides artists with increased visibility and recognition within our community of collectors. We will carefully curate and decide which artworks will be featured, ensuring that only the most noteworthy pieces receive this placement. By highlighting these creations, we aim to promote talent, inspire creativity, and connect creators with a broader audience of passionate collectors who appreciate their work.

# FEATURES

*Pawzaar is jam packed with features to make the user experience as enjoyable and efficient as possible.*

### DROPS
Our NFT marketplace offers a dedicated launchpad where projects can receive help with funding, marketing, and preparation in order to launch their unique NFT collections. As part of our commitment to supporting and fostering the growth of the Shiba Inu ecosystem, a percentage of earnings from NFT projects minting on our launchpad will be converted into $LEASH and sent to the burn address. This mechanism not only helps drive the value of $LEASH but also contributes to the overall sustainability and longevity of our platform. By providing a launchpad for NFT projects, we aim to provide creators with all the necessities to showcase their art and creativity to a wide audience of enthusiasts.

### LIST IN MULTIPLE CURRENCIES
List your NFTs using multiple different currencies such as $SHIB, $BONE. $LEASH, $STEAK, $ETH, along with $SHI and $TREAT once they have been launched.

### NFT BRIDGE (COMING SOON)
With the upcoming network comes the need to bridge all Shiba Inu-related collections. You will be able to bridge your NFTs from Ethereum to Shibarium. NFT bridging will enable users to bring their Shiboshi, Welly Friend, Shib Yard, and all other NFTs onto the Shibarium network. This feature serves as a vital tool for the upcoming SHIB metaverse project, providing users with the means to integrate and utilize their NFT assets into the Shibarium ecosystem.

### SHIBARIUM NFT CALENDAR (COMING SOON)
A comprehensive and user-friendly platform that keeps you up to date with all the upcoming NFT collections within the Shibarium network. Our calendar provides a centralized hub where enthusiasts and collectors can access information about the release dates, artist collaborations, and unique features of each upcoming collection. You will be able to stay ahead of the game by setting reminders, exploring previews, and planning your acquisition strategy for the latest Shibarium NFT drops. With the Shibarium NFT Calendar, you'll never miss an opportunity to own remarkable artworks and collectibles within the Shiba Inu community.

## INTAKE FORM

Artists that would like to end up on our launchpad or be sponsored on our marketplace with a spotlight will have the opportunity to apply by filling out our **intake form**.

# PAWFI

**It is soon time for the Pawfighters to explore the DeFi world. $PAW is making its way to becoming the $AAVE of the Shiba Inu ecosystem.**

STAKING

The moment of PawFi is upon us Pawfighters.

PawFi will initially roll out with staking on both the Ethereum and Shibarium networks. It is time to earn interest with your $PAW and Shiba Inu tokens. Stakable tokens include but are not limited to $SHIB, $BONE, $LEASH, $SHEB, $STEAK, and $PAW. I also plan to include $TREAT and $SHI when the time comes.

Once users stake their allocations, they will be able to see their earnings per day, active positions, amount claimable, and their total earnings all on the dashboard page. It is time to do more with your tokens and store them in a savings account in order to accrue APY.

BRIDGING

We want to encourage the onboarding process into the Shibarium network with a simplified bridging system that makes it easier than ever to participate in the Shiba Inu L2 network.

In addition to the ability to bridge the Shiba Inu tokens back and forth, we are going to be introducing a multi-chain bridge to allow users to bridge their ETH across various other networks onto the Shibarium network. This feature will promote significant inflows as it will make it far less costly to bridge funds onto Shibarium.

*Note you will still need to bridge $BONE via the Ethereum network to transact on the network.*

RAFFLES

Burning tokens is a very effective form of price stability that the Shiba Inu community are huge advocates for. However, many do not wish to simply throw away the money they have with no potential reciprocation. In attempts to make burning an enjoyable endeavor, we have created a burn raffle initiative. Every week there will be a prize people can enter a raffle for using $PAW and all funds raised from entries are then sent to the burn address.

Prizes can range from Shiboshis, Shib Metaverse Land, Sheboshis, token supply, and so much more. Pawpass holders will automatically qualify for every raffle.

BORROWING AND LENDING

The most ambitious endeavor is to become the very first borrowing and lending protocol on Shibarium. We want to innovate by adding more liquidity to the network and utilities for the PawZone and Shiba Inu tokens. With a borrowing and

lending protocol we can enable efficient allocation of capital by allowing users to lend their assets to earn interest and borrowers to access additional capital with the funds they already hold. This helps in deploying funds where they are most needed which greatly helps decentralized economic activity within the network.

We will incorporate risk management features, such as over-collateralization which helps mitigate the risk of defaults and ensure the stability of the system.

# Testnet Airdrop Campaign

**Participate in the campaign to qualify for a STEAK airdrop**

YOU MUST HOLD 50,000,000 🐾 TO BE ELIGIBLE FOR POINTS

## Phase One Points

**Earn 2 points every time you stake**

**Earn 1 point every time you claim**

Receive points for up to 10 stakes and 10 claims every day

## Multipliers

| | | | |
|---|---|---|---|
| 2X | 10 – 19 STEAK | 7X | 60 – 69 STEAK |
| 3X | 20 – 29 STEAK | 8X | 70 – 79 STEAK |
| 4X | 30 – 39 STEAK | 9X | 80 – 89 STEAK |
| 5X | 40 – 49 STEAK | 10X | 90 – 99 STEAK |
| 6X | 50 – 59 STEAK | 12X | 100+ STEAK |

Funds must be in the same wallet

**CHANGING LIVES ONE GAME AT A TIME**

Getting paid to play video games is the dream that is too good but true

COMING SOON

# PAWDAO

We at PawZone believe in the true incentive behind blockchain which is the ability to put the power in the right hands, not those that take advantage of the system. The PAWDAO will enable $PAW holders to be involved with vital decisions regarding the future of PawZone. **$PAW acts as our governance token and voting works through a weighted system. Therefore, the more $PAW an individual holds, the more say they will have in all future decisions.**

The role of PAWDAO, broadly speaking, is to increase user influence in web3 and let $PAW holders have a say about the projects revolving around their community. We want to give our community the power to influence decisions and incentivize active participation. One of the ways in which this will be achieved is through growing adoption of the PawZone brand by promoting and fostering our ecosystem of projects. The community around the PAWDAO will also generate value in many other ways we can't even fathom. That is, after all, the beauty of a DAO.

**In order to guarantee fair and secure decision-making, we have implemented a combination of Snapshot and Multisig protocols.** By utilizing Snapshot, we provide a platform where participants can cast their votes on various matters. This decentralized voting system allows everyone to have a voice and contribute to the decision-making process. Additionally, by incorporating Multisig technology, we enhance the integrity and reliability of the voting system. Through Multisig, multiple authorized individuals or entities are required to validate and sign off on the final outcome, thereby preventing any single point of failure or manipulation. By combining the power of Snapshot and Multisig, we are able to factor in and consider the votes of every participant, ensuring a transparent and inclusive decision-making process.

Here is a list of the many incidences in which the PAWDAO plays a major part in key decisions that will be voted on:

Governance Proposals

Policy Changes

Project Proposals

Strategic Partnerships

Asset Management

Community Grants

Protocol Upgrades

Community Initiatives

Application or Service Features

Curation, Testing, and Moderation

Guild Asset Purchases

Members should conduct thorough research and analysis before placing their vote.

**WHY THE SHIBARIUM NETWORK?**

The Shibarium Network is the network for the Shiba Inu ecosystem and offers a much cheaper alternative to the Ethereum Network. Given a faithful community as well as an effective layer 2 solution, the popularity of a marketplace, DeFi platform, and gaming guild seems inevitable.

Shibarium is now available for the public to access at the following link:

https://shibarium.shib.io/

# CONCLUSION

Pawzaar, PawFi, and Shiba Inu GG provide the necessary key components to elevate Shibarium to its full potential. With these projects working in harmony, all advancing the Shiba Inu ecosystem, PawZone is the dark knight steering the ecosystem back on the path towards Ryoshi's vision. We are going big and taking significant strides to make sure Shibarium becomes a thriving L2 garnering exponential network volume.

This objective is greater than any single one of us. Together, united as Ryoshi's, we can take Shiba Inu to the next level and demonstrate to all users of web3 the power of the people.

We extend our heartfelt gratitude to those who have placed their trust in us as we embark on this transformative journey. There is no community or mission we would rather build for. With the Pawfighters standing steadfast, the possibilities for growth and achievement know no bounds. Together, we unite as Ryoshi, safeguarding the Shiba Inu ecosystem.

We hope that this Pawpaper has shed light on our mission, vision, and the extraordinary potential that lies ahead. Thank you all sincerely and let's make our mark together, one PAW at a time.
